## ds Signed

Project Title	Project Description
IDEQ - Multi-Site Cooperative Agreement	Activities include providing oversight of investigations, studies, and cleanups of uncontrolled hazardous waste sites on the National Priorities List (NPL) in accordance with Section 104, of Comprehensive Environmental Response, Compensation & Liability Act (CERCLA), as amended. The sites are as follows: Eastern Michaud Flats (FMC), Eastern Michaud Flats (Simplot off-plant), Eastern Michaud Flats (Simplot On-plant), Eastern Michaud Flats (FMC Pond 15s & 16s), Monsanto, Kerr-McGee (Tronox), Talache Mine, and Orofino Riverview.
Performance Partnership Grants	This action provides partial funding in the amount of \$649,900 to the Mississippi Department of Environmental Quality. The funds will help support the State's efforts to protect citizens and the environment by reducing air pollution, improving water quality, reducing hazardous waste, improving waster management, preserving underground drinking water sources, improving accessibility of environmental information, promoting conservation of natural resources and sustainability, and returning Brownfields safely to productive use.
Performance Partnership Grants	The State of Georgia (DOAg) in support of a comprehensive program of registration, labeling, training, certification, inspections and enforcement to prevent unnecessary exposure to humans and the land and water by ensuring that pesticides are used and disposed of in the manner specified on each product.
Pesticide Enforcement, Applicator Certification, Ground Water, and Worker Protection Programs	This Cooperative Agreement to the Minnesota Department of Agriculture will enhance food safety and protect ground water, agricultural workers and handlers, and endangered species from pesticides. The work performed under this Cooperative Agreement will also reduce exposure to toxic pesticides and improve pesticide compliance leading to a cleaner environment. This will be done through the implementation of the State/Federal pesticide regulatory enforcement programs. The State will also address compliance assistance for regulated communities with new or problematic areas.

99861716-B	BG	EPA R8	\$517,576.00	3/15/2018	North Dakota Department of Health

Performance Partnership Grant (PPG) for State Fiscal Year 2018	The Performance Partnership Grant awards funds from several environmental management programs to the state in one grant. This grant is designed to provide greater flexibility to enable the state to address its highest environmental priorities, improve environmental performance, achieve environmental results, realize administrative savings, strengthen the partnership between the state and the Environmental Protection Agency (EPA), and secure the benefits of a clean and healthful environment to ourselves and future generations. The grant supports environmental programs for: air quality permitting, planning, monitoring and compliance; radon; asbestos; water quality permitting, planning, standards, monitoring, compliance, and site response; public water supply regulation and compliance; total maximum daily loads; underground storage tank management; hazardous waste management and compliance; solid waste reduction and recycling; and enforcement. Increase of Funds.
State of North Dakota - PPG Award	Grant funds are used by the North Dakota Department of Health to perform delegated program activities, perform quality assurance activities, and maintain regional and national data bases associated with environmental programs. These address clean air, clean water, hazardous and solid waste, drinking water, underground storage tanks, underground injection control, and radon. The Performance Partnership Grant (PPG) provides the State greater flexibility to address its highest environmental priorities, improve environmental performance, achieve administrative savings and strengthen the partnership between the State and EPA. Increase of Funds.
